

NovaSpark Technologies

B2B Services & Products Catalogue | 2025 Edition

NovaSpark Technologies is a B2B software company founded in 2017 and headquartered in Austin, Texas. We deliver AI-powered data infrastructure tools that help mid-market and enterprise teams ingest, process, and act on their data in real time. Serving 1,400+ customers across North America, Europe, and Asia-Pacific, NovaSpark is the trusted data platform for teams that need reliability, scale, and developer-first tooling.

Product Overview

NovaSpark offers five integrated products, each available standalone or as part of the NovaSpark Platform Bundle (30% discount when all five are purchased together).

1. SparkStream - Real-Time Data Pipeline

SparkStream is NovaSpark's flagship product: a fully managed, serverless event-streaming platform built on Apache Kafka. It handles ingestion, transformation, and routing of event data at up to 10 million events per second per tenant with sub-100 ms end-to-end latency at p99.

Key Features

- * 200+ pre-built connectors: Salesforce, Snowflake, PostgreSQL, S3, Webhook, and more.

*

Pricing

Tier	Monthly Price	Users	Volume	Uptime SLA
Starter	\$499 / mo	Up to 5	10M events/mo	99.9%
Professional	\$1,999 / mo	Up to 25	200M events/mo	99.95%
Enterprise	Custom	Unlimited	Custom commit	99.99%

Overage (Starter & Professional): \$0.12 per additional million events.

2. SparkDB - Analytical Data Warehouse

SparkDB is a columnar, ANSI-SQL analytical data warehouse optimised for workloads that mix batch reporting with interactive BI queries. Compute and storage are separated, so teams can pause clusters and pay only for storage when idle.

Key Features

- * Petabyte-scale storage on S3-compatible object storage.

*

Pricing

Tier	Monthly Price	Users	Volume	Uptime SLA
Starter	\$499 / mo	Up to 5	50 GB storage	99.9%
Professional	\$1,999 / mo	Up to 25	500 GB storage	99.95%
Enterprise	Custom	Unlimited	Custom commit	99.99%

Compute billed per vCPU-hour on active query clusters. Storage billed per GB-month (compressed).

3. SparkML - Machine Learning Platform

SparkML is an end-to-end MLOps platform that takes teams from feature engineering to model serving without leaving the NovaSpark ecosystem. GPU-accelerated training and one-click deployment remove infrastructure bottlenecks so data scientists can focus on models.

Key Features

- * Managed feature store with point-in-time correct joins.

*

Pricing

Tier	Monthly Price	Users	Volume	Uptime SLA
Starter	\$499 / mo	Up to 5	CPU training only	99.9%
Professional	\$1,999 / mo	Up to 25	A100 GPU access	99.95%
Enterprise	Custom	Unlimited	H100 + spot pools	99.99%

GPU training billed per GPU-hour at spot or on-demand rates. Inference endpoints billed per million requests.

4. SparkGovernance - Data Catalog & Lineage

SparkGovernance gives data teams a single pane of glass over all their data assets: tables, dashboards, ML models, and pipelines. It automatically harvests metadata and builds a column-level lineage graph so teams always know where data comes from and who owns it.

Key Features

- * Automated metadata harvesting via passive query-log analysis (no agents required).

*

Pricing

Tier	Monthly Price	Users	Volume	Uptime SLA
Starter	\$499 / mo	Up to 5	Up to 500 assets	99.9%
Professional	\$1,999 / mo	Up to 25	Up to 10K assets	99.95%
Enterprise	Custom	Unlimited	Unlimited assets	99.99%

5. SparkAlert - Anomaly Detection & Observability

SparkAlert monitors data pipelines and warehouse queries for anomalies, SLA breaches, and cost spikes -- alerting the right person before downstream consumers notice a problem. ML-based detection requires zero manual threshold-setting.

Key Features

- * ML-based anomaly detection with zero manual threshold-setting.

*

Pricing

Tier	Monthly Price	Users	Volume	Uptime SLA
Starter	\$499 / mo	Up to 5	Up to 50 monitors	99.9%
Professional	\$1,999 / mo	Up to 25	Up to 500 monitors	99.95%
Enterprise	Custom	Unlimited	Unlimited monitors	99.99%

Platform Bundle - All 5 Products at 30% Off

Purchase all five NovaSpark products together and receive a 30% discount off the sum of individual list prices. The bundle includes unified billing, a single Customer Success Manager, and cross-product dashboards.

- * Starter Bundle: ~\$1,747 / mo (5 products x \$499 x 0.70)

*

Security & Compliance

- * SOC 2 Type II -- annual third-party audit; report available on request.

*

B2B Professional Services Add-Ons

Implementation & Onboarding

Dedicated implementation engineers guide your team from sign-up to production. Typical engagement: 4-8 weeks.

- * Starter / Professional: self-serve onboarding + documentation portal. *

Training & Enablement

- * On-demand video library: 100+ hours of product training (all plans, free). *

Managed Services

- * Pipeline Management: NovaSpark SRE team manages your SparkStream pipelines. From \$3,000/mo. *

Support Tiers

- * Starter -- Community forum, documentation portal (docs.novaspark.io). 99.9% SLA. *

Contact & Next Steps

Every product includes a 14-day free trial with full functionality and no credit card required. Trials can be extended to 30 days on request.

- * Book a personalised demo: novaspark.io/demo *
